Volume 43

Marion, Crittenden County, Kentucky, Friday, March 11, 1921

No. 44

## SECOND ISSUE CARRIED BY LARGE MAJORITY

The bond election held Saturday for the purpose of voting \$20,000.00 for the purpose of building a High School for Marion came out a vote of 517 to 149. It is according to the Press to report the result of an election of this sort. This has always stood for better schools and for all other things help to build up the town and never and surely there is nothing more constructive in its work than school.

An unusually heavy vote was polled, practically all the voters of the town living up on one side or the question or the other. Good work was done by the ladies of the Improvement Club in helping carry the election. Many have since the election that if the school had been a week farther off the vote would have been practically unanimous for the bond issue. For a number of days during the early part of the week there seemed to be a great deal of misunderstanding relative to the voting of the bonds but members of the board and others interested in the results of the election and in the building of a bigger and better school for Marion took pains to explain the points in question.

The vote by precincts:

Precinct	Yes	No
1	122	23
2	97	19
3	98	17
4	103	34
5	72	16

The School Board reports that they hope to be able to start work on the new building just as soon as possible. They have promised the people of Marion a new school building for the High School and knowing the Board as it does, the Press has no hesitancy in predicting that they will make their word good. The members of the new Board are Herbert Morris, G. Thompson, Hollis C. Franklin, W. Stephen, C. W. Haynes and W. E. Cox.

## FARM AGENT APPOINTED

Fiscal Court and the officers of the County Farm Bureau met jointly on Monday and appointed Mr. Jno. E. Spencer County Agent of this County. Mr. Spencer is a graduate of Illinois State University and has been employed as Assistant Farm Agent for the past year in Hart and Daviess counties. Mr. Spencer is a native of Henry county, Illinois and is highly qualified for the position that he has been selected to fill. He will begin his duties about March 15 and will in all probability be in the city on next County Court day. His office will be established later. Mr. Spencer was in Marion this week and reports that he intends to start his work with an earnestness and a zest that will necessarily bring results. He owns his own automobile and says that our County Agent J. R. Byrd, has loaned him a horse to make his trips through the county.

It is certainly gratifying to learn that Crittenden county farmers have awakened to their need and that they are going after results. The advent of a Farm Agent marks a new era in the history of Crittenden county farming, and shows the progressive spirit that is beginning to manifest itself in our county.

## RESIDENCE TO BE ERECTED

Plans have been prepared by M. Arnold, Engineer, for a new residence for W. O. Tucker. This new home is to be erected on the corner lot adjoining M. H. Cannon's dwelling, which has been used in former years for the Chautauqua lot.

The new building will be of the semi-Bungalow style and will contain a living room, library, dining room, kitchen, breakfast room, pantry, four bed rooms, bath and sleeping porch. The house will have all the modern improvements and conveniences including both plumbing and heating systems.

Mr. Tucker, for whom the house is to be built is one of the firm of Foster & Tucker. Work will be started in the early months of this spring on the new residence. When completed it will be one of the most beautiful and complete dwellings in our city.

—Do you need a new made to measure suit? See the M. H. Cannon Co.

## METHODIST REVIVAL

The meeting continues with unabated interest and large crowds attending. People from the rural districts come on horseback and in two and four horse wagons as well as in buggies and automobiles. Great numbers of people are being saved and uniting with the church. Several factors enter in to make the revival a success.

First, the plain speaking, simple preaching of the Gospel without any attempt for display and the meekness of the preacher appeal to the congregation.

Second, the music is unexcelled anywhere. Billy Yates of our own town knows how to lead and is one of the greatest singers of the day. Both the adult and the Junior choir would be hard to beat anywhere. The orchestra adds greatly to the effectiveness of the choir. Miss Eva Yates and Mrs. W. O. Tucker preside at the piano and Mr. O. E. Guess at the organ. Besides these are M. H. Cannon, concert; Ted Bishop, saxophone; Guy Land, tuba; W. O. Tucker, clarinet; H. Moore from Jamey, W. D. Cannon, Geo. Crane, Miss Miriam Pierce, Mrs. E. A. Butler and Mrs. J. B. Wiggin, violins and Misses Laura Butler and Geneva Daniels and Mrs. Maurie Nunn, flutes.

Third, the courteous bunch of ushers, T. H. Cochise, A. Stephens, C. Grady, C. W. Lamb, H. C. Franklin, Maurice Nunn and Creed Taylor add much to the success of the meeting.

The constant personal work at the church, in the homes and in the streets by both men and women is a factor toward the success of the meeting. The way that members of the different churches work together is beautiful. A reporter said to Judge Carl Henderson one night that it was unusual to see circuit judges working to bring men to an altar for prayer. He replied "If everybody got saved we would not need any Circuit Courts." Judge Henderson is an especially active worker.

Including both the Methodist and Baptist revival there have been about 250 people united with the different churches in Marion.

## EYE TALKS

Sister E. Gilchrist, Opt. B.

The eye-ball is approximately spherical in shape, consisting of a large segment of a large sphere and a small segment of a small sphere. It is embedded in a fatty substance called the optical fascia, which serves as a shock absorber. The eye is made up of three layers of coats. The outer layer, the sclera and cornea, is for protection of the delicate interior and to give shape to the globe. The middle coat or choroid is composed principally of blood vessels which nourish the whole eye. The inner coat, the retina, is mainly the termination of the optic nerve, which enters at the back of the eye, known as the blind spot, and branches out over the inner surface. As light travels in straight lines, one of the requisites of vision is refraction or the bending of rays of light so that they may be brought to a focus upon the retina. For this purpose the eye has a cornea, two media which fill the anterior and posterior chambers of the eye and a lens which is constructed of concentric layers, like the layers of an onion, and is soft and adjustable to changes of the vascular surface, caused by contractions of the canal which surrounds it. The adjustment of this lens for far and near vision is called accommodation.

## GIRLS WANTED

We are now seeking about 150 girls and can use 50 or 75 more at once. The work is light, easy and very fascinating, and all girls like the work. We pay more than your expenses while learning, and after you have learned you will have a position you like, and pay well. The working conditions are splendid, and steady employment. If your family desire to move to Princeton, we will procure a house for them. Write to PRINCETON HOSIERY MILLS, Inc., Princeton, Kentucky 2.

The soil of Mississippi produces a better flavor in sweet potatoes than Kentucky soil. A trial will convince you, meet me in Marion March 14 and be convinced. J. Frank Conner.

—Do you need a new made to measure suit? See the M. H. Cannon Co.

## TRIP TO DAIRY BARN

# Do You Bank by Mail?

There are many of our customers whom we rarely ever see. Many of them we have never seen.

These customers make frequent deposits but send them by mail. They live many miles from Marion but Uncle Sam's postal service makes it convenient for them to bank with us.

If it is not convenient for you to come to town regularly, why not try banking by mail? You will be pleased with our service.

If you are in Marion Monday, County Court Day—or any other day, come in and see us.

## Farmers Bank & Trust Co.

Marion, Ky.

## MARION GIRL MAKES HIGH MARKS

Miss Mildred Summerville, daughter of Mr. and Mrs. J. R. Summerville of Depot Street, has received very creditable marks on her studies at State University. Miss Summerville is taking eight subjects and during the first semester she made six A's and two B's. She has never fallen below B in any of her classes. She graduates this year.

## KILLED BY FALL FROM AUTOMOBILE

In attempting to jump on a moving automobile, Thomas Randolph Guess, a senior in Livingston county High School at Smithland was fatally injured Thursday afternoon.

He died in about fifteen minutes after the accident as a result of concussion of the brain.

Young Guess had started to join a party of friends passing on the street and tried to jump on the running board of the car before it slowed down. He was thrown on his head striking the body of the car with great force. His skull was crushed and efforts of physicians to restore him to consciousness were unavailing.

He was the son of J. C. Guess, of Salem and was a popular member of the High School at Smithland. He was an active participant in student activities.

## RESIDENCE BURNS

The home of G. M. Travis, who lives near Marion, was burned Sunday morning about 11 o'clock while the family were visiting at the home of Josh McDonald nearby.

When the fire was discovered it was too late to check it. Everything was destroyed but two feather beds, some meat and canned fruit. The next house was also burned. It is reported that Mr. Travis lost his inheritance.

## MARRIED AT ROSICLARE

On Sunday night, February 27, Mr. Thomas L. Hughes and Miss Laura Hill both of Rosiclare were united in marriage. The ceremony took place in the Methodist parsonage parlor by Rev. Page.

The bride is a charming young lady of Rosiclare and is loved by all for her sweet disposition.

The groom is a popular young man of splendid character and well known among his many friends of this country.

They will make their home at Rosiclare, where Mr. Hughes has been employed for some time.

## FALLING SCAFFOLD INJURES WORKMAN

Monday morning while working on the front of the D. O. Carnahan building Coleman Byford was severely injured by a falling scaffold. Mr. Byford was working under the platform with the intention of moving it when it fell on him. He sustained painful injuries but not serious. He was bruised on the shoulder and hip and cut about the face.

The building on which he was working was damaged during the recent fire and he with several other workmen were doing repair work. No one else was injured.

There has been quite a bit of repair work done already on the Carnahan building. It has been re-roofed and the walls that were damaged have been repaired. There remains yet a new front to be put on. Mr. Carnahan also intends to paper and paint the offices in the second story of the building. This renovation will add greatly to the beauty of the building and make it one of the most desirable in our city.

## NOTICE TO FARM BUREAU MEMBERS

On Monday the 14th, County Court day, there will be a meeting of the Board of Directors of the Crittenden County Farm Bureau at the Court House. All members of the organization who care to be present are cordially invited to attend. Meeting called at 1:30 P. M.

## CALDWELL SPRINGS CLOSED

Friday, March 4, Caldwell Springs school closed a successful term with a large number of pupils and patrons present.

The afternoon was spent in spelling and arithmetic contests between pupils and patrons.

An interesting ball game was played by the boys and men, the boys winning.

The district is very anxious to secure another room to the building as the present one is entirely too small to fill the needs of the district.

Marion Brasher, Elmer Travis and Syvia Loft received certificates of promotion to the High School.

## BAPTIST CHURCH

The congregation of the First Baptist church of this city has under consideration plans for the enlargement of the church and also to build or purchase a new Pastor's home.

Plans will soon be complete and the work is expected to start this spring.

## UNCLE SAM AND THE DISABLED SOLDIER

### BY DR. FRANK CRAYNE

The trip to Mr. Paris' had been planned since school began but the weather or some other hindrance had always prevented, and in spite of the clouds Thursday we did not put it off any longer. Two miles of walking on muddy roads through fields, up and down hills did not appeal to us much, but let me say that I have never been sorry I went.

He has by far the nicest dairy barn in the county. I have often driven along the road and wondered if the interior was as nice as the exterior, but after one glimpse I saw that it looked much better within than without.

The first thing I noticed when I stepped in was the floor.

Around the walls and down the center was smooth concrete about five feet wide, with a concrete litter trough on each side.

All this including the trough was as clean as water could have made it.

The lady of the house informed us before we went to see the barn that they were not expecting us and everything was awful dirty, but I haven't been able to see yet how it could have been cleaner.

The floor of the stalls were of solid clay and bedded with clean straw, which showed that the herd enjoyed comfort as well as cleanliness.

All the inner part was white-washed and ventilation was provided by a window for every two stations.

There were twenty stations all inexpensive, yet as practical as could have been secured at any price,

and a roomy private concrete trough for each stall, with deep sides so each cow got only her part and no more.

The silo was located at the upper end of the barn and contained several feet of sweet smelling silage.

It had been filled with corn (Hastings Prolific), especially suited for silage, the entire silo, 10x24, being filled from 3½ acres.

The truck was large, pivoted on one wheel so as to be easily turned and had the sides constructed as to extend over the feed trough and prohibit all waste.

One end of the entire building was used for feed room and milk room.

Both were ceiled and well lighted.

The milk room was as clean as any dining room.

It contained a well stove, cream separator, milk cans, bottles, towels and other articles necessary about the dairy.

On one side of it was a cellar or ice box, made of concrete just below the floor about 2x3x8, and an ideal place for keeping products on ice.

The door of the cellar was easily raised by a weight.

The feed room was well filled with bran, chaff, and cotton-seed meal.

The ration then fed was three parts cotton-seed meal five parts

chopped corn, five parts wheat bran, with silage and good hay.

But the feature of the lower floor that attracted most of us was the litter carrier.

An overhead rack on both sides leads to the main track which passes through the calf shed to a concrete manure pit under cover.

The litter carrier saved many times its cost in work the first winter, while the covered concrete manure pit cost but little and is an absolute necessity for greatest profit from dairying.

Near the silo were broad steps leading into the loft.

The barn was covered with a self supporting roof and furnished plenty of room for feed.

A track and hay fork were used for storing the hay in the loft.

It was about one half full at the time of our visit.

He has about 18 cows in the herd now, most of them Jerseys.

He keeps several small calves to drink the skim milk.

A good squirrel cured registered Jersey bull was in a separate barn in the lot.

The entire arrangement showed economy, sanitation, forethought and convenience.

If other farmers of the county would follow his example the entire county would be greatly changed.

## AN AGRICULTURE STUDENT

### DAUGHRAY-WELDON

Mr. Jerry Daughray and Mrs. Florence Weldon were married at the residence of the bride Tuesday evening at 6 o'clock in the presence of a few relatives and friends. Rev. K. M. Eaton officiated. Both the bride and groom are residents of this city and have many friends who will extend congratulations.
